15-May-02

MEMORANDUM FOR DAMIS USERS

SUBJECT: Software Version Description (SVD) for the Installation Support Module (ISM) Drug and Alcohol Management Information System (DAMIS) Interim Change Package (ICP) P6A-AVM-11-08A.

1. Enclosed is ICP P6A-AVM-11-08A, which provides a formal change to Drug and Alcohol Management Information System (DAMIS).

2. Acknowledgement of this ICP installation must be made IAW instructions provided in Enclosure 1.

3. This memorandum certifies that the ISM subject software has been thoroughly tested, is considered to be a quality product, and is hereby authorized for release to a production environment.

4. Security Implications: None.

SOFTWARE VERSION DESCRIPTION (SVD) FOR THE
Drug and Alcohol Management Information System (DAMIS)
INTERIM CHANGE PACKAGE (ICP) (P6A-AVM-11-08A)

DEPARTMENT OF THE ARMY
OFFICE OF THE PROGRAM EXECUTIVE OFFICER
STANDARD ARMY MANAGEMENT INFORMATION SYSTEM
(PEO EIS)
9350 HALL ROAD, SUITE 142
FORT BELVOIR, VIRGINIA 22060-5526

CONTENTS

1.0 Scope.

1.1 Identification.

This Software Version Description (SVD) applies to the Drug and Alcohol Management Information System (DAMIS) running on a networked AIX operating system on UNIX platforms.

1.2 System Overview.

DAMIS is part of the ISM Project that is an Army-wide Major Automated Information System (MAIS) initiative. The primary ISM objective is to enhance, through automation, installation management functions. ISM applications consist of standard procedures packaged into functional applications that automate as well as integrate day-to-day installation processes. ISM applications use the Installation Level Integrated DataBase (ILIDB), which is the central repository for data that is common to more than one ISM application, and various local databases that contain data elements unique to the individual ISM applications.

The purpose of the DAMIS ISM is to automate management of the client's drug and alcohol detection and treatment processing. The application sponsor is the Director of Management (DM) Office Chief of Staff, Army (OCSA).

1.3 Document Overview.

This document provides the instructions necessary for implementing the formal DAMIS Interim Change Package (ICP) P6A-AVM-11-08A. It informs the users of the changes made to the system and provides Points of Contact (POCs) in the event of questions or problems.

2.0 Referenced Documents.

This paragraph has been tailored out.

3.0 Version Description.

3.1 Inventory of Materials Released.

This paragraph has been tailored out.

3.2 Inventory of Software Contents.

Hardware platform UNIX AIX OS users (installation supported).

This change package contains the following files.

Program	Version	Update
Damis_1108.cpio.Z	11.08	05-April-2002
install_damis_1108	11.08	05-April-2002
README.damis_1108	11.08	05-April-2002

3.3 Changes Installed.

3.3.1   Corrector Descriptions—Technical.

1.   ECP-S/E   P6A-S108-038
      A. CYCLES: 1.1.1
      B. PROGRAM: DAMIS
      C. PROBLEM: 1) UNDER PATIENT SERVICES MENU, #1
                        ADD/CHANGE INDIVIDUAL ID DATA/ COMMANDER
                        NONREFERRAL, JUSTIFICATION CODE "M"
                        OTHER BRINGS UP A LINE TO ENTER "OTHER"
                        INFORMATION. HOWEVER, IF YOU GO BACK
                        INTO THE SAME ID SCREEN, THE INFORMATION
                        HAS   NOT BEEN SAVED.
      D. RESOLUTION: When the user creates or updates an ID
                        record the comment entered by the user
                        is now saved after the user commits
                        information on page 2 of 2 (F3).
      E. ICP: P6A-AVM-11-08A
2.   ECP-S/E   P6A-R102-004
      A. CYCLES: 1.2.1.2.3
      B. PROGRAM: DAMIS
      C. PROBLEM: Creating an ID record from the MRO
                        screen with a future date causes errors
                        in the patient ID record.
      D. RESOLUTION: THE USER IS PROMPED TO ENTER A DATE IS
                        ON OR BEFORE THE CURRENT CALANDER DATE.
      E. ICP: P6A-AVM-11-08A

3.3.2 Corrector Descriptions—Functional.

None.

3.3.3 Summary of Changes.

1. Copy library member changes.

    a. Changed: None.

    b. Deleted: None.

    c. Added: None.

2. Control library member changes.

    a. Changed: None.

    b. Deleted: None.

    c. Added: None.

3.4 Adaptation Data.

This paragraph has been tailored out.

4.0 Related Documents.

4.1.1 Technical Documentation Changes.

(These changes include new functionality that should be included in the next AIX version of Software Center Operator Manual (SCOM).)

4.1.2 Functional Manual Changes.

These changes include new functionality that should be included in the next AIX version of Software User Manual (SUM).

4.2 Installation Instructions.

Integrated Baseline: In the integrated baseline, the applications are to be expanded on to the Golden Master before it is sent. Therefore, there are no specific instructions on how to install. For all ISM applications you must run install_prg.

Install Procedure: This procedure installs ICP P6A-AVM-11-08A DAMIS R04.03 AIX version 4.2 operating system baseline onto the installation server. This portion of DAMIS R04.03 must be installed on each server at the installation.

Use the following procedure to install the ICP P6A-AVM-11-08A:

Step 1.   Verify that there is a login account and directory for *damis*.

Step 2.   Log in with the login name of *root*.

Step 3.   Change directory to /usr/tmp.

Step 4.   Create a directory named "damisICP.1108."

Step 5.   Change the directory to /usr/tmp/damisICP.1108.

Step 6.   Copy the following files to /usr/tmp/damisICP.1108:

Program	Size	Update
Damis_1108.cpio.Z	4738917	05-April-2002
install_damis_1108	1602	15-April-2002
README.damis_1108	1326	15-April-2002

Step 7.   Execute the following commands:

```
chmod 777 install_damis_1108 <Enter>
./install_damis_1108        <Enter>
```

Step 8.   The install_damis_1108 script will complete the following:

   a.   Uncompress the damis_1108.cpio.Z file. Then it will un-cpio the damis_1108.cpio file into the home directory of the user "*damis*".

Change the ownership and mode of the files to the correct settings.

   b.   It will record all output(s) from each of the steps performed in a file named "damis_1108.log" located in /tmp/damisICP.1108 directory.

Note: The resulting log, damis_1108.log, should then be
copied to the sdcw directory upon termination of the
installation process. This resulting log should then
be reviewed.

4.2.1   Installation Effective Date.

This ICP should be immediately implemented upon receipt or NLT
30 days from date of receipt.

4.2.2   Security Implications.

This paragraph has been tailored out.

4.2.3   CONUS-TNOSC Installation Instructions.

All users receive the same baseline with a change package
number through e-mail and Status Tracking and Reporting System
(STARS) Bulletin Board System (BBS). This change package
contains the following files:

Quantity	File ID	System	Change Package No.
1	Damis_1108.cpio.Z	AIX OS 4.2	P6A-AVM-11-08A
	install_damis_1108		
	README.damis_1108		

Ensure completion of all master file backups prior to loading
this package.

Use these load instructions to develop load procedures that
work best for your installation.

Due to various user configurations, each installation must
determine appropriate block-size and library allocations.

Note: Users must **not** make changes to the files.

Security impact: None.

4.2.4 Special Installation Instructions—All Users.

None.

4.2.5 Point of Contact.

If there are any problems or questions with the installation, or any shortage to the contents of this package, call the Army Continental United States-Theater Network Operations and Security Center, (CONUS-TNOSC) Ft. Huachuca: DSN 879-6798/6858 or 1-800-305-3036.

4.2.6 Report of Implementation.

Report the implementation of this change package by completing the change package implementation form. Send this report to Ft. Huachuca using Fax or Email.

4.3 Possible Problems and Known Errors.

This paragraph has been tailored out.

5.0 Notes
